

# The AI that understands international trade

Ask anything about global trade in plain language. Get accurate, sourced answers in seconds.

## THE WHY NOW

### Global Trade is Fragmented and High-Risk.

- Complexity**  
Teams jump between 8+ disconnected platforms and manuals.
- Risk**  
A single HS classification error leads to 6-figure fines and port delays.
- Data Leakage**  
Enterprises cannot use public AI due to strict trade secrecy.

## THE SOLUTION

### One Brain. Total Compliance. Zero Data Leakage.

Wyndle consolidates +860,000 regulatory records into a specialized AI expert that reasons like a trade lawyer. It automates classification, monitors sanctions, and audits documents—all inside the client's own infrastructure.

 <p><b>HS Classification</b> Automated tariff code assignment with audit trail</p>	 <p><b>Sanctions Monitor</b> Real-time screening against global sanctions lists</p>	 <p><b>Document Audit</b> Intelligent review of trade documents for compliance gaps</p>
---	--	--

**+860,000**  
Verified Records

## THE DATA MOAT

Our proprietary dataset isn't just large; it's high-density. We train on Court Rulings and Audit Precedents that general AIs cannot access.

-  Court Rulings
-  Audit Precedents
-  HS Logic Chains

## BUSINESS IMPACT

### Measurable Results from Day One.

 <p><b>90%</b> Reduction in Compliance Search Time</p>	 <p><b>0</b> Human Errors in HS Classification</p>	 <p><b>100%</b> Data Sovereignty — On-Premise Deployment</p>
---	---	---

## THE INVESTMENT

### Raising €750K

to scale the OS for International Trade.

-  **Core Data Infrastructure 100% Completed**  
Ready for Pilot Phase

PRE-SEED ROUND

**€750K**
